

# Your office shouldn't be a single point of failure for your business.

**Keep critical systems running when your office can't.**

Office Down

**Business Up**

**What happens if your office loses power for three days? Can...**

employees work?

orders move?

finance operate?

clients be served?

## Data Center & Colocation, simply explained

You own the technology. We provide the purpose-built data center environment where it runs.

Move critical infrastructure out of your office while keeping control of the systems your business relies on.

### KEEP OPERATIONS MOVING

Reduce the chance that a facility problem takes critical applications and business processes offline.

### PROTECT REVENUE & CLIENTS

Keep employees connected to the systems they need to process orders, serve client, invoice, and operate.

### REDUCE INFRASTRUCTURE BURDEN

Move critical technology away from office power, cooling, space, access, and facility constraints.

### KEEP CONTROL & FLEXIBILITY

Own infrastructure where it makes sense while choosing the right mix of data center, cloud, and on-site technology.

## Where businesses use it

ERP & Accounting

Business Applications

Data Storage

Backup & Recovery

Private Infrastructure

Multi-site Operations

Hybrid Cloud

AI Solutions & SLMs

**If your building had a disruption for the next three days, what parts of your business would stop working?**

Find out before an outage does.
